**2. HAZARDS IDENTIFICATION**

**POTENTIAL HEALTH EFFECTS: EMERGENCY OVERVIEW**

**CAUTION.** Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes, and clothing.

- EYES:** May cause temporary irritation, tearing, and blurred vision.
- SKIN:** Can cause skin irritation. Can cause a burning or pricking sensation on more sensitive areas (face, eyes, mouth).
- SKIN ABSORPTION:** Harmful if absorbed through the skin.
- INGESTION:** Harmful if swallowed.
- INHALATION:** Excessive inhalation may cause nasal and respiratory irritation.
- CHRONIC EFFECTS:** None known.
- CARCINOGENICITY:** None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as being carcinogens.
- Carcinogenicity/  
Oncogenicity:  
Pyrethrins and PBO** Pyrethrum has been tested in chronic feeding studies in mice and rats. Slightly elevated incidences of benign tumors of the thyroid and liver were seen in rats following high doses of Pyrethrum. Further detailed scientific studies into the mechanism causing these responses indicate that these effects in the animals only occur at doses greatly exceeding the likely human exposure levels. Thus, the effects seen in animals are of little relevance to humans.

Marginally higher incidences of benign liver tumors in mice were observed following lifetime high dose exposures to PBO. The doses at which tumors were observed for pyrethrum and PBO greatly exceeded potential human exposure from labeled uses. Doses at which these effects were observed greatly exceed anticipated human dietary intake. At anticipated dietary exposure levels, it is highly unlikely that this product will result in carcinogenic effects.

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**4. FIRST-AID MEASURES**

**FIRST AID PROCEDURES:**

- EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
- SKIN:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
- INHALATION:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
- INGESTION:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
- NOTE TO PHYSICIANS:** For skin effects, a highly efficient therapeutic agent for Pyrethrin exposure is topical application of Tocopherol Acetate (Vitamin E).
